

# Satin Wraps

Contemporary Satin Wraps are based on the style of a three-dimensional canvas wrap, where your image wraps around the edge of the block.

The block provides depth and the print is finished with an attractive satin laminate.

Prints are supplied with an MDF baton, for wall mounting. This baton lifts the block out from the wall, giving the print a 'magically suspended' appearance.

When choosing an image for a Satin wrap, please take into account that the edge of the image is being wrapped around the block itself.
